He highlights potential conflicts between professional ethics and legal guidelines and expands discussions of informed consent, confidentiality and privileged communication, boundaries and dual relationships, documentation, conflicts of interest, and risk management. **Culture, Values and Ethics in Social Work**-Richard Hugman 2012-08-23
"This groundbreaking book examines the ways in which questions of culture and diversity impact on the values and ethics of social work. Using detailed case studies to illustrate key points for practice, Richard Hugman discusses how social workers can develop culturally-competent ethical practice and work creatively with the tensions it sometimes involves. Debates rage over whether there is a core set of unchangeable social work values or whether they might be different at different times and for different people. This textbook proposes a new approach of 'ethical pluralism' for social work practice, in which both shared humanity and the rich variety of cultures contribute to a more dynamic way of understanding social work's underpinning values and ethics. In particular, this book explores the implications of a pluralist approach to ethics for the central questions of: Human rights and social justice Caring relationships Social and personal responsibilities Agency and autonomy Values such as truth, honesty, openness, service and competence. It is vital that social workers understand the values and ethics of their profession as a crucial part of the foundations on which practice is built and this is the only text to explore the connections between culture, values and ethics and fully develop the pluralist approach in social work. Culture, Values and Ethics in Social Work is essential reading for all social work students and academics. "--

Social Work, Law and Ethics-Jonathan Dickens 2012-09-18 Law and ethics are two vital aspects of social work – all social workers need to practise according to the law and their codes of ethics and conduct. However, the relationship between the law and social work values and ethics is not without its tensions and this book takes a problem-based approach to explore the dilemmas and challenges that can arise. The first part of the book sets out frameworks for thinking about the law and ethics, and how they relate to social work. It also introduces some of the big philosophical and sociological questions about the purposes of law and of ethics and how they relate to society more generally. In the second part, the book explores a series of areas where profound dilemmas arise – such as end-of-life decisions, respecting peoples' choices but ensuring their safety and that of others, responsibility and blame, making allowance for different cultural traditions and breaking confidentiality. In each of the problem-based chapters, this accessible text: outlines the relevant law discusses court judgments in leading cases considers the implications of different ethical frameworks pulls out key ethical questions and challenges for social work. Social Work, Law and Ethics highlights what the law says and what it offers, what ethical principles are at stake, and what these imply for social work policy and practice. In this way, it uses real-life scenarios to analyse the dynamic interactions of social work, law and ethics. It is essential reading for all social work students.

This collection, which includes essays from an array of professions and disciplines, is designed to bring these neglected topics to the attention of readers and to offer suggestions for addressing them in a manner that is faithful to obligations described in social work codes of ethics.

**Ethical Practice in Social Work** - Michael Collingridge 2020-07-17 This innovative text shows why ethics is so important for social work practice, that it is not simply a way of defining and understanding what is good in practice, but is a means by which social work and other caring professions can actually achieve good practice. Professor Richard Hugman, University of NSW This book integrates ethical theory and political philosophy into a clear yet challenging framework for ethical action in social work. Firmly grounded in practice examples, it will be of great interest both to students and practitioners in the field. Professor Sarah Banks, Durham University In an increasingly fragmented and regulated world, the authors of Ethical Practice in Social Work argue that social work has become detached from its ethical roots. Their aim is to reinstate ethics as the driving force of good social work and welfare practice. Ethical Practice in Social Work provides the tools to develop essential ethical decision-making and problem-solving skills. Taking an applied approach with case studies in each chapter, the authors demonstrate how ethical principles can be used to transform practice into an effective, inclusive and empowering process for both professionals and their clients. They discuss the ethical principles social workers have traditionally adhered to, the role of the good social worker in the contemporary context, professionalism, and the way in which ethics can be used to reconcile the often differing demands of employers, community groups, clients, the profession and their own personal values. Ethical Practice in Social Work is a valuable professional reference and student text.

The commentaries, written by authors from different countries, refer to relevant theories, concepts, practical matters, alternative courses of action and their implications. Knowledge Production in Material Spaces-Nikki Fairchild 2021-11-12 Knowledge Production in Material Spaces is a curation of the interventions that the authors undertook at a range of academic conferences since 2016. It problematizes disciplined practices and expectations governing academic conference spaces and generates new ways of thinking and doing conferences otherwise. The authors use posthuman, feminist materialist and post-qualitative theories to disrupt knowledge production in neoliberal and bureaucratic conferences spaces. The analysis they offer, and the rhizomatic writing and presentational styles they use, promote a form of educational activism through theory. They interrogate the conference space as a regulated, normalized and standardized mode of academic knowledge production – which they call the ‘AcademicConferenceMachine’ – and playfully subvert the dominant meanings and modes of conferences and workshops to show how we can better interact and produce research, with and for each other. The authors indicate how creative conference practices promote playful possibilities to imagine and produce knowledge differently. This book will appeal to audiences ranging from established professionals to
early career scholars, doctoral and master’s students in Education and the social sciences.

**Critical Ethics of Care in Social Work** - Bob Pease 2017-10-06 This book argues that the concept of care is a political and a moral concept. As such, it enables us to examine moral and political life through a radically different lens. The editors and contributors to the book argue that care has the potential to interrogate relationships of power and to be a tool for radical political analysis for an emerging critical social work that is concerned with human rights and social justice. The book brings a critical ethics of care into the realm of theory and practice in social work. Informed by critical theory, feminism, intersectionality and post-colonialism, the book interrogates the concept of care in a wide range of social work settings. It examines care in the context of social neglect, interdisciplinary perspectives, the responsibilisation agenda in social work and the ongoing debate about care and justice. It situates care in the settings of mental health, homelessness, elder care, child protection, asylum seekers and humanitarian aid. It further demonstrates what can be learnt about care from the post-colonial margins, Aboriginal societies, LGBTI communities and disability politics. It demonstrates ways of transforming the politics and practices of care through the work of feminist mothers, caring practices by men, meditations on love, rethinking self-care, extending care to the natural environment and the principles informing cross-species care. The book will be invaluable to social workers, human service practitioners and managers who are involved in the practice of delivering care, and it will assist them to challenge the punitive and hurtful strategies of neoliberal rationalisation. The critical theoretical focus of the book has significance beyond social work, including nursing, psychology, medicine, allied health and criminal justice.
