Animal Cruelty, Antisocial Behaviour, and Aggression: Eleonora Gullone 2012-11-20 Through comprehensive reviews of theory and research related to animal cruelty, antisocial behaviour, and aggression, Gullone clearly demonstrates that animal cruelty behaviours are another form of antisocial behaviour, that they appear alongside human aggression and violence, as well as other crimes involving non-violent crimes. Almost without exception, the perpetrators of animal cruelty crimes are the same individuals who carry out a host of other antisocial crimes or misdemeanors including assault, partner and child abuse, and bullying. For those whose criminal careers begin in adolescence, animal cruelty is commonly used as a means of demonstrating the power and control they wish to have over others. Over time, the use of animal cruelty escalates into more serious crimes as severity increases.

Sixty percent of the offenders had been arrested for interpersonal violence prior, concurrent and/or post the instant animal cruelty incident. For those whose criminal careers begin in childhood (i.e. the early starters), without intervention, it is highly likely that their antisocial activities will continue into their adult years, in most cases increasing in severity. It is therefore time to begin treating animal cruelty crimes more seriously, to prevent further harm not only against the innocent animals who will otherwise become the victims of these individuals but also against potential human victims.

Violence in Animal Cruelty Offenders Tisha Hoffer 2018-06-30 This book presents results from a BAU study involving 259 active, animal cruelty cases. In addition, there were a total of 405 animal victims including numerous species, but dogs (64%) were the predominant animal victim. The offenders were all male, ranging in age from 15 to 75 years (mean age 34 years) and 73.4% had arrests for various other crimes prior to and following the instant animal cruelty act.

However, in the manner of you visit this web page, it will be correspondingly unconditionally easy to acquire as without difficulty as download lead animal cruelty antisocial behaviour and aggression more than a link author Eleonora Gullone published on december 2012

Psychopathy and Criminal Behaviour: Paulo Marques 2021-11-01 Psychopathy and Criminal Behaviour: Current Trends and Challenges fills a gap in the market by covering new topics and angles not addressed in other literature. This fourth edition of the Handbook highlights advances in the field, with 11 new chapters and over 40% new material. In reading this book, therapists will discover the benefits of incorporating animal-assisted therapy (AAT) into their practices, best practices in animal-assisted intervention, how to design and implement animal assisted interventions. Provides methods, guidelines, and standards for AAT Discusses animal-assisted therapy (AAT) for children, the elderly, and special populations. Describes AAT use in different settings Includes 11 new chapters and 40% new material

The Ethical Case against Animal Experiments Andrew Linzey 2017-12-21 At present, human beings worldwide are using an estimated 115 million animals in experiments.” A devastating look at a contemporary moral crisis, The Ethical Case against Animal Experiments melds logic to compassion to mount a powerful challenge to human cruelty.

educate animal caregivers to look past "cuteness" in order to treat all animals with dignity. The dichotomy classes with three short sections focusing on animals in farming, trade, and popular culture. The author examines how common stereotypes and beliefs about animals shape job assignments and daily life for animals. Contributors: Judith Bout-Schwarzburg, Vanessa Carli Bones, Grace Clement, SimonCoghlan, Priscilla N. Cohn, Mark J. Estes, Elena Galkina, Eleonora Gallo, Matthew C. Halmann, AndrewKnight, DrewLeder, AndrewLinsey, ClayLlanty, Kay Peggs, Megan Schommer, CliffordWarwick, and James W. Youtz.

**Animals, Work, and the Promise of Interspecies Solidarity**-Kendra Coulter 2014-04-29 In this thought-provoking and innovative book, Kendra Coulter examines the diversity of work done by, for, and by animals. Investigating human-animal studies, labor theories and research, and feminist political economy, Coulter develops a labor theory of the domination of nature and the domination of the Other “as nature”. As this blueprint of oppression repeats itself where there are vectors of difference, the chapters focus on ways in which patriarchy is foregrounded by another hierarchy—human domination over “nature”. Thus, gender violence stems from a logic of domination that is built on ideologies of “natural” and “unnatural” relationships. This book is an important starting point for evaluations in animal maltreatment cases. Animal Maltreatment is the first book to provide an overview of animal maltreatment as a legal, clinical, and forensic issue. It offers guidance for mental health and legal professionals involved in the adjudication of animal maltreatment offenses, with a special focus on forensic mental health assessments in such cases. The book reviews the legal and social contexts of animal maltreatment and then describes research-based and clinical knowledge within the area. It offers perspectives on social and clinical responses in animal maltreatment cases and describes prospects for an area of forensic mental health assessment focused specifically on the forensic evaluation in cases of animal maltreatment. This is the first book that brings together descriptions of the characteristics of those who maltreat animals, factors associated with animal maltreatment behaviors, information about the impact on the animals themselves, and evaluations of intervention strategies to help others who have engaged in such behavior. Animal Maltreatment will be of great benefit and interest to general and forensic psychologists, psychiatrists, and social workers, as well as lawyers, legal scholars and students, veterinarians, humane law enforcement professionals, and others involved in animal welfare advocacy.

**Gender Violence in Ecofeminist Perspective**-Gwen Huxham 2019-09-23 This book aims to begin an eco-centered, eco-feminist informed discussion about the ways in which our relationship to “nature” is bound up with gender, patriarchy, and violence. Ecofeminist scholars study the interconnections between gendered relationships of domination among humans, between humans and between humans, nonhumans, and the earth. It is in this ideological and structural tangled web of the environment that a deeper understanding of gender violence is possible. Ecofeminism offers analytical possibilities for understanding a “logic of domination” which sustain a whole host of problems, including the interrelated oppressions of gender violence and exploitation of the more-than-human-life world. In this book, Gwen Huxham explores some of the ways in which the feminist and ecofeminist analyses connect to the nonhumans who do or have a role in the societal punishments. The book also examines the possibilities of ecofeminism to help save the earth. It is essential reading for students and instructors in sociology, gender violence and interdisciplinary violence studies, critical animal studies, environmental studies, and feminist and ecofeminist studies.

**Animals and Natural Ethics-Kai Hornborga** 2015-07-21 The claim is frequently made on behalf of African moral beliefs and practices that they do not object explicitly and practically exist as Western ethics does. This book investigates whether this is correct and what kind of status is reserved for other-than-human animals in African ethics.

**Animals in the Classical World-A. Harden 2013-09-24** This book presents nearly 200 specially translated Greek and Roman texts from Homer to Plutarch, revealing the place of the animal in the moral consciousness of Ancient society. Philosophical, historical, dramatic and poetic texts explore how animals were regarded in all aspects of ancient life, from philosophy to politics.

**Animals in China-Deborah Cao 2015-08-25** As China is called the world factory for manufactured goods, it is also a world factory for manufactured animal cruelty in a new phenomenon of globalized animal cruelty. Animals in China examines animal protection in China in its legal, social and cultural contexts.

**Animals in Social Work-R. Yang 2014-10-09** This collection of essays articulates theoretical and philosophical arguments, and advanced practical applications, as to why animals ought to matter to social work, in and of themselves. It serves as a persuasive corrective to the current invisibility of animals in contemporary social work practice and thought.

**Christian Thought and the Status of Animals**-R. McLaughlin 2014-07-13 The author argues that there are conflicting traditions with regard to the question of what the moral standing of animals according to Christianity. The dominant tradition maintains that animals are primarily resources but there are alternative traditions that argue for animal rights. This collection challenges this view.

The **Moral Equality of Humans and Animals**-Mark H Bernstein 2015-05-19 Received opinion has it that humans are morally superior to non-human animals; humans are interested only in the likes of interests and the value of human life is alleged to be greater than the value of nonhuman animal life. Since this belief causes mayhem and murder, its de-mystification requires urgent attention.

Enviromental, Health, and Business Opportunities in the New Meat Alternatives Market-Boguesa. Diana 2018-12-28 There are various innovations and new technologies being produced in the energy, transportation, and building industries to combat climate change and improve environmental performance, but another way to reduce carbon footprints and improve sustainability is to change our food consumption. Growing meat and meat industries utilizing meat alternatives to create a more engaged consumer, a stronger economy, and a better environment. Highlighting topics such as meat consumption, nutrition, health, and gender perspectives, this book is ideally designed for policymakers, economists, health professionals, nutritionists, technology developers, academicians, and graduate-level students.

**Power, Knowledge, Animals-Loa Johnson 2012-10-10** This work contributes to the development of a theoretical context of the politics of truth about animals. By applying and extending Foucault’s theory of power, this work uncovers dominant and subjugated discourses about animals and describes power-knowledge associated with statements about animals that are accepted to be true.

Animal Harm-Angus Norris 2014-04-15 Why do people harm, injure, torture and kill animals? This book evaluates the reasons why these crimes are committed and outlines the characteristics of the animal offender. It considers ethical and value judgments made about animals and the tacit acknowledgement and justification of unacceptable criminal behaviour towards the harming of animals made by offenders. Situating animal abuse, wildlife crime, illegal wildlife trading and other unlawful animal activities within a criminological framework, the book also provides an initial evaluation of the introduction of relevant legislation. Taking a broad approach, the book considers the killing and harming of animals in an international context and examines the extent to which laws and policies reflect the various animal ethics and environmental animal ethics approaches and different perspectives on the moral status of animals.

**Why Animal Suffering Matters**-Andrew Linsey 2013-11-21 In this book Linsey argues deeply and engagingly that the killing and harming of animals is a moral wrong.

Making Sense of Homicide-Adam Lynam 2021-01-15 The first dedicated textbook for Criminology students studying homicide. As the authors explain, criminal homicide is one of the most lethal forms of lethal violence and suffers from a much broader range of scenarios. Ranging from murder to manslaughter, this book examines the theories put forward in the study of homicide.

Criminological and Forensic Psychology-Helen Garis 2013-11-01 Criminological and Forensic Psychology is a broad-new theoretically rigorous, practically relevant, engaging and fun introduction to this broad and fascinating field. It covers both the conceptual basis within which psychology is applied in forensic contexts and the practical applications of psychology to criminal and civil justice systems. Key Features: Case studies, which include the James Bulger investigation in Chapter 5, and the effectiveness of forensic evidence in court, are used to illustrate the importance of forensic psychology. The book is divided into two parts: The sections of Part 2 are written by experts in the field and the material in the book is based on the latest research. A Companion Website available at www.sagepub.co.uk/garisCFP is provided to support learning and includes chapter-by-chapter multiple choice questions to test understanding of the material, additional case studies to reinforce learning, and links to further readings to continue your exploration of the subject.

Unhealthy Harms, Simon 2012-08-29 This book provides critical perspectives to ask what alternatives are available to identify the early signs and stop the cycle. The International Health and Animal Abuse and Cruelty: Research, Education and Applications is for students who want to learn about animal abuse and cruelty in the United States and abroad and are interested in research into the effects of animal cruelty and violence on human and public health.

The Psychology of Interpersonal Violence-Cline R. Hollow 2016-02-16 David P. Farrington, Emeritus Professor of Psychological Criminology, Cambridge University. The book provides fresh, insightful, and engaging research and thoughtful discussion of the research on the causes of violence in general, and of crime specifically and the psychology of the interpersonal violence perpetrators.

The New Zealand Book of Beasts-Annie Potts 2014-03-01 Touching on indigenous Maori relationships with the new-est, flightless moa, the attitudes of Pakeha, or European, settlers toward sheep; the iconography of whales and dolphins; the problems of pest-control; and the pleasures of pet-keeping, this modern-day bestseller in a

**Trophy Hunting-Geoff Beattie 2019-08-10** This book explores the psychology of trophy hunting from a critical perspective and considers the reasons why some people are drawn to the sport of hunting, while others may find it unethical or even revolting. The book examines the psychological factors that influence individuals' decisions to engage in trophy hunting and provides insights into how these factors can be used to promote more ethical hunting practices. In addition, the book explores the psychological consequences of trophy hunting, including the potential for psychological harm to the individuals who engage in the activity and the potential for psychological harm to those who are impacted by the activities of trophy hunters.

**The Jury - David A. Grinspun 2015-09-02** This book is an essential resource for anyone interested in the psychology of jury decision-making. It examines the factors that influence jury decision-making, including the role of emotion, the influence of expert witnesses, and the impact of the trial context. The book also provides an in-depth analysis of the research on jury decision-making, including the accuracy of jury decisions, the influence of jury instructions, and the impact of jury size.

**Mind and The Jury:** A dedicated chapter on research methods specific to forensic psychology to help you do your research project around this topic. A Companion Website available at www.sagepub.co.uk/gavinCFP is provided to support learning and includes chapter-by-chapter multiple choice questions to test understanding of the material, additional case studies to reinforce learning, and links to further readings to continue your exploration of the subject. The book is a comprehensive and practical guide to the psychology of jury decision-making, providing insights into the latest research and best practices in the field.
fascinating study of human-animal relations. In the book’s four parts, the authors unravel the contradictory ways New Zealanders nurture and eradicate, glorify and demonize, cherish and devour, and describe and imagine animals. The study brings together insights from New Zealand’s arts and literature, popular culture, historiography, media, and everyday life to describe and analyze their interactions with nga kararehe and nga manu, the beasts and birds of the land. In doing so, it illuminates fundamental aspects of New Zealand society: how New Zealanders understand their own identities and those of others; how they regard, inhabit and make use of the natural world; and how they think about what they buy, eat, wear, watch, and read. Rich, multifaceted, and engaging, A New Zealand Book of Beasts satisfyingly explores how culture both shapes and is shaped by the “beasts” of Aotearoa.

Why Do Kids Do That? - Richard C. Woolfson 2004 Being a parent is one of life’s most rewarding experiences, but it can also be one of the most daunting. This resourceful and engaging guide demystifies children’s behavior and provides readers with all the tools they need for becoming confident and happy parents. Written by a child psychologist and parenting expert, it covers typical behavior from infancy through age 8. Practical matters such as eating habits, potty training, and bedtimes are discussed in-depth, along with more complicated issues such as bullying, shyness, and sibling rivalry. Sound advice, smart tips, and colorful charts and sidebars will show parents how to respond to their child’s emotional needs and build a loving, lasting relationship.

Unleashed - Simon Harding 2014-02-01 Drawing on evidence from both sides of the Atlantic, Simon Harding explores the culture of the status dog in Unleashed. In housing projects in the United States and United Kingdom, certain dog breeds convey status—authority, respect, power, and control—on their owners, while urban street gangs have developed the dangerous practice of training dogs to be weapons. Combining perspectives from sociology, criminology, and public policy, Harding contextualizes these related phenomena and considers the complex mix of factors motivating them, including urban deprivation, social control of public space, and the influence of media imagery.

Psychology and Crime - Clive R. Hollin 2013-01-17 Crime is an expensive aspect of society, and each year huge amounts of public money are spent on the courts, police, probation services, and prisons, while the human costs in terms of pain, fear and loss is incalculable. Psychology and Crime comprehensively covers the vital role of psychological theories and methods in understanding and managing criminal behaviour: It analyses in depth the application of psychological findings to a range of serious crimes, such as arson, violent crime, and sexual crime. It examines the use of psychology by the police and the courts and discusses the role of psychology in crime reduction strategies. Written by a leading authority on the subject and informed by over twenty years of teaching experience, the second edition of this popular text has been thoroughly revised and updated to take account of the most recent research in the field. New features also include: Expansive coverage of the development of criminal behaviour; Chapter summaries and end-of-chapter discussion points; Text boxes throughout highlighting key issues, debates and brief histories; Supplementary online resources at www.routledge.com/cw/hollin. Psychology and Crime is an essential introduction and reference for undergraduate and postgraduate students in psychology, criminology, sociology and related subjects. It also represents an invaluable resource for professional training courses and anyone planning a career in the criminal justice system.

Manitoba Law Journal: Criminal Law Edition (Robson Crim) 2019 Volume 42(4) Richard Jochelson, et al. Robson Crim is housed in Robson Hall, one of Canada’s oldest law schools. Robson Hall has transformed into a Canada wide research hub in criminal law, with blog contributions from coast to coast, and from outside of this nation’s borders. With over 30 academic peer collaborators at Canada’s top law schools, Robson Crim is bringing leading criminal law research and writing to the reader. We also annually publish a special edition criminal law volume of the Manitoba Law Journal, providing a chance for authors to enter the peer reviewed fray. The Journal has ranked in the top 0.1 percent on Academia.edu and is widely used. This issue has articles from a variety of contributing authors including: David Ireland, Richard Jochelson, Heather Cavo, Peter Sanko, Jason M. Chin, Michael Lutsky, Riel E. Deve, John W. Burchill, Christopher Searlattan, Craig Forcese, Nicholas Rosati, Stephanie Ben-Ishai, Arash Nayerahmadi, Prashan Ranasinghe, Rebecca Jaremko Bromwich, Gailah Joyce, James Gacek, and Ryan Ziegler.
