Polaris Rising -Jessie Mihalik 2019-02-05 “Polaris Rising is space opera at its best, intense and addictive, a story of honor, courage, betrayal, and love. Jessie Mihalik is an author to watch.”--Ilona Andrews, #1 New York Times bestselling author A space princess on the run and a notorious outlaw soldier become unlikely allies in this imaginative, sexy space opera adventure—the first in an exciting science fiction trilogy. In the far distant future, the universe is officially ruled by the Royal Consortium, but the High Councillors, the heads of the three High Houses, wield the true power. As the fifth of six children, Ada von Hasenberg has no authority; her only value to her High House is as a pawn in a political marriage. When her father arranges for her to wed a noble from House Rockhurst, a man she neither wants nor loves, Ada seizes control of her own destiny. The spirited princess flees before the betrothal ceremony and disappears among the stars. Ada eluded her father’s forces for two years, but now her luck has run out. To ensure she cannot escape again, the fiery princess is thrown into a prison cell with Marcus Loch. Known as the Devil of Fornax Zero, Loch is rumored to have killed his entire chain of command during the Fornax Rebellion, and the Consortium wants his head. When the ship returning them to Earth is attacked by a battle cruiser from rival House Rockhurst, Ada realizes that if her jilted fiancé captures her, she’ll become a political prisoner and a liability to her House. Her only hope is to strike a deal with the dangerous fugitive: a fortune if he helps her escape. But when you make a deal with an irresistibly attractive Devil, you may lose more than you bargained for . . .

Split Tooth -Tanya Tagaq 2018-09-25 Longlisted for the 2018 Scotiabank Giller Prize Shortlisted for the 2019 Amazon First Novel Award Shortlisted for the 2019 Kobo Emerging Writer Prize Winner of the 2019 Indigenous Voices Award for Published Prose in English Winner of the 2018 Alcuin Society Awards for Excellence in Book Design - Prose Fiction Longlisted for the 2019 Sunburst Award From the internationally acclaimed Inuit throat singer who has dazzled and enthralled the world with music it had never heard before, a fierce, tender, heartbreaking story unlike anything you've ever read. Fact can be as strange as fiction. It can also be as dark, as violent, as rapturous. In the end, there may be no difference between them. A girl grows up in Nunavut in the 1970s. She knows joy, and friendship, and parents' love. She knows boredom, and listlessness, and bullying. She knows the tedium of the everyday world, and the raw, amoral power of the ice and sky, the seductive energy of the animal world. She knows the ravages of alcohol, and violence at the hands of those she should be able to trust. She sees the spirits that surround her, and the immense power that dwarfs all of us. When she becomes pregnant, she must navigate all this. Veering back and forth between the grittiest features of a small arctic town, the electrifying proximity of the world of animals, and ravishing world of myth, Tanya Tagaq explores a world where the distinctions between good and evil, animal and human, victim and transgressor, real and imagined lose their meaning, but the guiding power of love remains. Haunting, brooding, exhilarating, and tender all at once, Tagaq moves effortlessly between fiction and memoir, myth and reality, poetry and prose, and conjures a world and a heroine readers will never forget.
Extinct Animals: An Encyclopedia of Species that Have Disappeared during Human History -Ross Piper 2009-03-20 Everyone is familiar with the dodo and the woolly mammoth, but how many people have heard of the scimitar cat and the Falkland Island fox? Extinct Animals portrays over 60 remarkable animals that have been lost forever during the relatively recent geological past. Each entry provides a concise discussion of the history of the animal—how and where it lived, and how it became extinct—as well as the scientific discovery and analysis of the creature. In addition, this work examines what led to extinction—from the role of cyclical swings in the Earth’s climate to the spread of humans and their activities. Many scientists believe that we are in the middle of a mass extinction right now, caused by the human undermining of the earth’s complex systems that support life. Understanding what caused the extinction of animals in the past may help us understand and prevent the extinction of species in the future. Extinct Animals examines the biology and history of some of the most interesting creatures that have ever lived, including: The American Terror Bird, which probably became extinct over 1 million years ago, who were massive predators, some of which were almost 10 feet tall; the Rocky Mountain Locust, last seen in 1902, formed the most immense animal aggregations ever known, with swarms estimated to include over 10 trillion insects; the Giant Ground Sloth, which was as large as an elephant; and the Neandertals, the first Europeans, which co-existed with prehistoric Homo sapiens. Extinct Animals includes illustrations—many created for the work—that help the reader visualize the extinct creature, and each entry concludes with a list of resources for those who wish to do further research.

The Demolished Man -Alfred Bester 2018-01-08 #4 in the Millennium SF Masterworks series, a library of the finest science fiction ever written. The first Hugo Award winner for best novel in 1953. “One of the all-time classics of science fiction.”—Isaac Asimov “Bester’s two superb books have stood the test of time. For nearly sixty years they’ve held their place on everybody’s list of the ten greatest sf novels” —Robert Silverberg In a world policed by telepaths, Ben Reich plans to commit a crime that hasn’t been heard of in 70 years: murder. That’s the only option left for Reich, whose company is losing a 10-year death struggle with rival D’Courtney Enterprises. Terrorized in his dreams by The Man With No Face and driven to the edge after D’Courtney refuses a merger offer, Reich murders his rival and bribes a high-ranking telepath to help him cover his tracks. But while police prefect Lincoln Powell knows Reich is guilty, his telepath's knowledge is a far cry from admissible evidence. Alfred Bester was among the first important authors of contemporary science fiction. His passionate novels of worldly adventure, high intellect, and tremendous verve, The Stars My Destination and the Hugo Award winning The Demolished Man, established Bester as a s.f. grandmaster, a reputation that was ratified by the Science Fiction Writers of America shortly before his death. Bester also was an acclaimed journalist for Holiday magazine, a reviewer for the Magazine of Fantasy and Science Fiction and even a writer for Superman.

Elsevier's Dictionary of Geography-Vladimir Kotlyakov 2006-12-20 Geography is a system of highly developed sciences about the environment. Geographical science embracing the study of the Earth's physical phenomena, people and their economic activities has always been in need of an extensive terminology. Geographical terms are related to the terms of natural sciences (physics, chemistry, biology, geology, etc.) and humanities (history, economics, sociology, etc.) since geography is based on these fundamental subjects. Geography includes a number of disciplines and subdivisions which appeared along with the development of the science In spite of being very different geographical disciplines have some common tools of investigation which is maps, comparative method of exploration, remote sensing, geoinformation systems. Today very well developed terminologies of all the specialist fields of geography and related subjects exist in the main world languages. However, they are not always well-correlated. Nowadays geographical terminology requires unification and international correlation more than ever before. Hence the idea of compiling a multilingual polydisciplinary dictionary. The Dictionary consists of the basic table of terms arranged according to the order of the English alphabet with each term numbered. Each entry consists of the term in English and its equivalents in Russian, French, German, Spanish. Short definitions of terms are given in English and in Russian. The terms are supplied with the necessary grammar labels, such as gender of nouns, plural number, etc. The Dictionary combines two functions: that of a defining dictionary and that of a bilingual dictionary. These two functions are basically contradictory because usually the defining dictionary is aimed at giving one meaning of the word which is the main and essential one, while the bilingual dictionary tries to give different equivalents of a given word in the other language in order to supply the user with maximum possible translations, differing in the shades of meanings, thus giving him the possibility to choose the appropriate word. But in our Dictionary we intentionally decided to combine the two functions - defining and multilingual, because a short definition of the term and equivalents in other languages help to achieve our main aim which consists in showing the basic geographical terminology and harmonizing it in several languages. Having this into consideration we deliberately mixed two types of dictionaries in one. Organized alphabetically via English Provides short definition of geographical terms in English and Russian Includes multilingual translation of terms from English to Russian, French, German, Spanish

Environment and Food-Colin Sage 2011-07-07 This timely book provides a thorough introduction to the inter-relationship of food and the environment. Its primary purpose is to bring to our attention the multiplicity of linkages and interconnections between what we eat and how this impacts on the earth’s resources. Having a better idea of the consequences of our food choices might encourage us to develop more sustainable practices of production and consumption in the decades ahead. Although human societies have, over time, brought under control a large proportion of the earth’s resources for the purpose of food production, we remain subject to the effective functioning of global ecosystem services. The author highlights the vital importance of these services and explains why we should be concerned about the depletion of freshwater resources, soil fertility decline and loss of biological diversity. The book also tackles some of the enormous challenges of our era: climate change - to which the agri-food system is both a major contributor and a vulnerable sector - and the prospect of significantly higher energy prices, arising from the peaking of oil and gas supplies which will reveal how dependent the food system has become upon cheap fossil fuels. Such challenges are likely to have significant implications for the long-term functioning of global supply chains and raise profound questions regarding the nutritional security of the world’s population. Taken together the book argues that a re-examination of the assumptions and practices underpinning the contemporary food system is urgently required. Environment and Food is a highly original, inter-disciplinary and accessible text that will be of interest to students and the wider public genuinely interested in and concerned by the state of the world’s food provisioning system. It is richly illustrated with figures and makes extensive use of boxes to highlight relevant examples.

Onyx & Ivory-Mindee Arnett 2018-05-15 “At once fresh, at once classic, Onyx and Ivory is a page-turning blend of monsters, magic, and romance.” —Susan Dennard, New York Times bestselling author of Truthwitch Acclaimed author Mindee Arnett thrusts readers into a beautiful, dangerous, and magical world in this stunningly epic and romantic fantasy for fans of Leigh Bardugo and Sarah Raasch. They call her Traitor Kate. It’s a title Kate Brighton inherited from her father after he tried to assassinate the high king of Rime. Cast out of the nobility, Kate now works for the royal courier service. Only the most skilled ride for the Relay and only the fastest survive, for when night falls, the drakes—deadly flightless dragons—come out to hunt. Fortunately, Kate has a secret edge: She is a wilder, born with forbidden magic that allows her to influence the minds of animals. And it’s this magic that leads her to a caravan massacred by drakes in broad daylight—the only survivor Corwin Tormaine, the son of the king. Her first love, the boy she swore to forget after he condemned her father to death. With their paths once more entangled, Kate and Corwin must put the past behind them to face this new threat and an even darker menace stirring in the kingdom.

Confronting Commercial Sexual Exploitation and Sex Trafficking of Minors in the United States-National Research Council 2013-11-12 Every day in the United States, children and adolescents are victims of commercial sexual exploitation and sex trafficking. Despite the serious and long-term consequences for victims

as well as their families, communities, and society, efforts to prevent, identify, and respond to these crimes are largely under supported, inefficient, uncoordinated, and unevaluated. Confronting Commercial Sexual Exploitation and Sex Trafficking of Minors in the United States examines commercial sexual exploitation and sex trafficking of U.S. citizens and lawful permanent residents of the United States under age 18. According to this report, efforts to prevent, identify, and respond to these crimes require better collaborative approaches that build upon the capabilities of people and entities from a range of sectors. In addition, such efforts need to confront demand and the individuals who commit and benefit from these crimes. The report recommends increased awareness and understanding, strengthening of the law's response, strengthening of research to advance understanding and to support the development of prevention and intervention strategies, support for multi-sector and interagency collaboration, and creation of a digital information-sharing platform. A nation that is unaware of these problems or disengaged from solutions unwittingly contributes to the ongoing abuse of minors. If acted upon in a coordinated and comprehensive manner, the recommendations of Confronting Commercial Sexual Exploitation and Sex Trafficking of Minors in the United States can help advance and strengthen the nation's emerging efforts to prevent, identify, and respond to commercial sexual exploitation and sex trafficking of minors in the United States.

Special Operations Patrol Vehicles-Leigh Neville 2011-09-20 The patrol vehicles used by Special Operations Forces in Afghanistan and Iraq vary quite dramatically between the theatres as well as amongst the Coalition members, and have been developed and upgraded to meet the demands of the deployment. Covering all the major Coalition nations, Leigh Neville continues his look at the elite forces deployed in Operations Enduring Freedom and Iraqi Freedom, with this analysis of their vehicles. Tracing the evolution of the vehicle types, from their historical precedents, through their designs to their operational developments, he discusses their advantages and disadvantages, along with their tactical employment. From the mine-protected vehicles used to counter the IED threat in Iraq, the use of Strykers as armoured raiding platforms by the US Rangers, to the civilian vehicles adapted for military service by both Coalition troops and Private Military Contractors in the regions, this book uses rare in-theatre photographs and colour artwork to show the variety and inventiveness of the patrol vehicles being used in combat today.
