Going home after laparoscopic cholecystectomy. Most people recover quickly from laparoscopic cholecystectomy. You may be able to go home the day of your surgery or stay just one night. You should arrange for someone to drive you home as the effects of anaesthesia can take a few hours to wear off. Similarly, conaghan et al reported decreased iv opioid use in laparoscopic colorectal resections with tap + pca versus pca alone. 41 although there is limited evidence to suggest improvement in pain scores and opioid consumption after abdominal surgery, further studies are needed to evaluate the role of tap blocks compared with other modalities. In this article, we shall look at the ... Vascular surgery, urology, surgical oncology, radiology, ophthalmology, pediatric surgery, anaesthesia, trauma services, minimal access surgery, endocrine surgery, ent, colorectal surgery, laparoscopic and endoscopic techniques and.
