Alan Bryden is deputy head of research at the Geneva Centre for the Democratic Control of Armed Forces (Switzerland). Heiner Hnggi is assistant director and head of Security Governance in Post-conflict Peacebuilding.

It argues that transitional justice in peacebuilding must be conceived of as actor-contingent and malleable due to the significance of agency and (inter)actions of key actors. These actors operate in the context of power relations, which have economic, social, cultural, political, and military dimensions. The book examines the role of transitional justice in peacebuilding through a combination of theoretical perspectives and empirical analysis. It provides a valuable contribution to the understanding of transitional justice’s potential and limitations in peacebuilding contexts.

As transitional justice continues to be celebrated and promoted around the globe, this book provides a much-needed reflection on its role and promises. It not only critiques transitional justice frameworks but offers new ways of thinking about questions of violence, conflict, justice and inequality. It was originally published as a special issue of the Australian Feminist Law Journal.

Transitional Justice and Reconciliation - Martina Fischer 2015-11-06 Scholars and practitioners alike agree that somehow the past needs to be addressed in order to enable individuals and collectives to rebuild trust and relationships. However, they also continue to struggle with critical questions. When is the right moment to address the legacies of the past after violent conflict? How can societies address the past without deepening the pain that arises from memories related to the violence and crimes committed in war? How can various actors deal constructively with different interpretations of facts and history? Two decades after the wars, societies in Bosnia, Serbia and Croatia – albeit to different degrees – are still facing the legacies of the 1990s in a daily basis. Reconciliation between and within these societies remains a formidable challenge. This book engages scholars and practitioners from the regions of former Yugoslavia, as well as international experts, to reflect on the achievements and challenges that transitional justice efforts have met in the past. Drawing variously on empirical studies, theoretical discussions, and practical experience, their contributions offer invaluable insights into the complex relationship between transitional justice and conflict transformation.

As War Ends - James Meernik 2019-07-31 For decades a bitter civil war tore apart Colombia government and armed insurgent groups. After protracted negotiations in Havana, a peace agreement was accepted by the Colombian government and the FARC rebel group in 2016. This volume will provide academics and practitioners throughout the world with critical analyses regarding what we know generally about the post-war peace building process and how this can be applied to the specifics of the Colombian case to assist in the design and implementation of post-war peace building programs and policies. This unique group of Colombian and international scholars comment on critical aspects of the peace process in Colombia, transitional justice mechanisms, the role of state and non-state actors at the national and local levels, and how the Colombian case reveals about traditional theories and approaches to peace and transitional justice.

The Conceptual Foundations of Transitional Justice - Colleen Murphy 2015-04-19 Countries have attempted to transition to democracy following conflict or repression. Yet, the basic meaning of transitional justice remains hotly contested. In this book, Colleen Murphy analyses transitional justice - showing how it is distinguished from retributive, corrective, and distributive justice - and outlines the ethical standards which societies attempting to democratize should follow. She argues that transitional justice involves the just pursuit of societal transformation. Such transformation requires political reconciliation, which in turn has a complex set of institutional and interpersonal requirements including the rule of law. She shows how societal transformation is influenced by the moral claims of victims and the demands of perpetrators, and how justice processes can fail to be just by failing to foster this transformation or by not treating victims and perpetrators fairly. Her book will be accessible and enlightening for philosophers, political and social scientists, policy analysts, and legal and human rights scholars and activists.
