Our book servers saves in multiple countries, allowing you to get the most less latency time to download any of our books like this one. Meryl said, the a disease of society cultural and institutional responses to aids is universally compatible with any devices to read

A Disease of Society-Scott V. Paris 1990

A Disease of Society-Professor Dorothy Nelkin 1991-02-22 This book, first published in 1991, argues that AIDS is a ‘disease of society’, which is challenging and changing society profoundly.

A Disease of Society-

Cultural Change and the Market Revolution in America, 1785-1860-Scott C. Martin 2005 In this exciting new work, Scott C. Martin brings together cutting-edge scholarship and articles from diverse sources to explore the cultural dimensions of the market revolution in America. By reflecting on the reciprocal relationship between cultural and economic change, the work deepens our understanding of American society during the turbulent early nineteenth century.

Choices and Conflict Emily Friedman 1992-06-29 Should Dr. Jack Kerouac be allowed to facilitate the suicides of sick women? To what extent should high technology be incorporated into health care practices? The integration of health care and public policy has taken health care ethics beyond the hospital walls. This book provides a choice selection of articles reflecting the current environment of bioethics. Leaders will gain insight from a wide variety of prominent thinkers in health care.

Hospice and Palliative Care in Africa-Michael Wright 2006-08-24 Conflict, poverty, endemic diseases, and lack of clean water pose serious challenges for the population in Africa. This book focuses on palliative care and hospice development, examining the development of palliative care services in 26 African countries where initiatives have been identified.

New World and Pacific Civilizations-Glen Burenhult 1994 A vivid survey of the ancient wonders of the New World and Pacific Islands includes the civilizations of the Maya, Aztecs, Incas, and Native North Americans, as well as the cultures of the Pacific Islands and Japanese.

Sexually Transmitted Infections-Dan Danielsson 1990

Excerpta Medica- 1990

Health & Physical Assessment-Violet Barkauskas 1998 Written by an all-nurse author team, Health and Physical Assessment presents a comprehensive approach to health assessment in which client health, rather than a diagnosis, is the focus. In this book, the client is perceived as a total entity, rather than as an individual with a specific problem that the practitioner must diagnose. Assessing health and identifying health strengths are emphasized and related to promoting and improving people’s health. This edition features a new introductory chapter on clinical reasoning in determining health status, giving readers an overview of the process of health assessment.

Contraception Across Cultures-Andrew Russell 2000-04 Contraception is an issue of considerable concern to a great many heterosexually active people. Yet the impact of contraceptive technologies in the world today, in particular their implications for kinship, gender relations, and other aspects of social life, receives relatively little scholarly attention. This book brings a new perspective to the study of contraception, by collecting together in one volume leading experts in the fields of contraception, family planning and reproductive health. Contributors look at the social, economic, political and cultural contexts in which contraceptive providers and recipients make decisions about whether and what forms of contraception to use. User perspectives (whether those of recipients or providers of contraceptive services) are taken seriously, as are the perspectives of policy-makers and development experts. With its in-depth, case-study approach, this challenging book will appeal to practitioners and planners in the fields of family planning and reproductive health, as well as to students and academicians of applied and medical anthropology, health studies, gender and development studies, or anyone interested in the social, cultural and ethical issues raised by contraceptive technologies.

Empirical Studies of Psychoanalytical Theories-Joseph M. Masling 1983 Few theories have influenced Western thought as much as psychoanalysis has, even in the absence of empirical confirmatory evidence. The raw data of psychoanalysis are the words and actions of the patient and their interpretation by the analyst. The psychoanalytic session has excluded other observers and, until very recently, even a tape recorder. The only evidence of what transpired between patient and therapist was supplied by the memories, accounts, and records each of them might have kept. The degree to which each could be objective and veridical in recording the events in treatment is not known, but given the intense, emotional nature of the clinical interaction, it is likely that systematic distortions, omissions, and inventions occurred.

Health Assessment & Promotion Strategies Through the Life Span-Both Beckmann Murray 1997 A holistic approach to the health care of individuals and families, this indispensable resource offers specific guidelines for nursing assessment with suggested interventions and health promotion strategies at each developmental stage from birth to death. The sixth edition of this popular book provides a critical pathway paradigm for health.

Jahrbuch für transkulturelle Medizin und Psychotherapie- 2000

Models of the Cultural and Biological Aspects of Childhood Nutrition-Carolyn Luis McCullagh 1989

Indigenous Peoples and Diabetes-Mariana Kassell Leal Ferreres 2006 Indigenous Peoples and Diabetes is a bold attempt to redefine the meaning of diabetes mellitus as a socio-political disorder from the perspective of Indigenous Peoples, community workers, medical anthropologists, and health professionals working and/or living in North America, Latin America, the Arctic, Australia, and the Indian Ocean. The anthology discusses the effects of social history on the etiology and epidemiology of type 2 diabetes within Indigenous experiences of cultural expansionism and colonial occupation. Indigenous narratives about the right to food, health, emotional experience, and the importance of networks of solidarity provide reflective critiques on community wellness, empowering individuals to regain control of their health, spiritual knowledge, and emotional liberty. The book is a paradigm-breaking endeavor because it challenges the widespread assumption that Indigenous Peoples all over the planet are inherently susceptible to sicken and die from degenerative ailments such as diabetes because of their faulty genotype, poor dietary habits, and sedentary lifestyle. Instead, the creative assemblage of chapters shifts the medical gaze from a potentially diseased body to a diseased colonial and post-colonial history of...
genocide practiced against Indigenous Peoples to this day. Innovative programs to combat the diabetes epidemic and promote physical and emotional wellness are discussed in detail, such as the Mino-Mijim ‘Good Food for the Future’ program on the White Earth Reservation in Minnesota; the Kahnawake School Diabetes Prevention Project developed in the Kanien'kehaka (Mohawk) community of Kahnawake, near Montreal, Canada; and the Cultural Rebuilding Project at the Potawot Health Village in northern California. The authors are inspired by a strong commitment to a liberation medicine and in the belief that access to good food, respect for cultural traditions, and integrative therapies are basic human rights.

Bulgarian Journal of Agricultural Science- 2004

The Dream of Culture-Howard F. Stein 1994 Here an innovative psychoanalytic anthropologist explores in sixteen intense essays: Slovak ethnic identity, theory of ethnicity, culture theory, cultural relativism & problems of medical organizational consultation. Stein's main influences are Freud & Weston LaBarre: from both he retains the grounding in biology of both classical psychoanalysis & anthropology. Particularly fascinating gems are the essays on the Evil Eye, the Swaddling Ethos, "The Eye of the Outsider," one on anthropology's dogma of cultural relativism & "Alcoholism as Metaphor in American Culture." The title essay, the Introduction, presents a provocative theory of the relationship of culture to the dream. He knowingly portrays the process of culture change in both anthropological & psychodynamic terms. "He has the capacity to see through to the meaning of things, & to understand it & express it with precision—a quality that people used to refer to as genius."-Prof. Howard Schwartz, Oakland University. Order from Psyche Press, P.O. Box 780, New York, NY 10024; 212-721-4466.
