Quality Assurance Implementation in Research Labs: Akshay Anand 2021-08-17 This book is a comprehensive and timely compilation of strategy, methods, and implementation of a proof of concept modified quality module of Good Laboratory Practices (GLP). This text provides a historical overview of GLP and related standards of quality assurance practices in clinical testing laboratories as well as basic research settings. It specifically discusses the need and challenges in audit, documentation, and strategies for its implementation in system-dependent productivity in research laboratories. It also describes the importance of periodic training of study directors as well as the role of standardization in research processes. This book addresses different areas such as procurement at various time points of a successful Ph.D. and post-doc tenure along with quality assurance practices in research laboratories. Variable social responsibility and quality assurance in the developing world, data accuracy, and communication, digitization in data accuracy, auditability and back traceability have also been discussed. This book will be a preferred source for principal investigators, research scholars, and industrial research centers. From the foreword by Ratan Tata, India: "This book will be a guide for students and professionals alike in quality assurance practices related to clinical research laboratories. The historical research and fundamental principles make it a good tool in clinical research environments. The country has a great need for such a compilation in order to increase the application of domestic capabilities and technology."
