Security and Migration in the 21st Century-Elspeth Guild 2009-09-28 The 21st century has brought new and challenging dimensions to our understanding of security and migration. The Cold War framework of security as related to war and peace, international relations and foreign affairs has given way to a multiplicity of competing notions, including internal security, human security and even social security. At the same time, migration has become a hotly contested issue, characterized by an enormous difference of times and objectives. So what do we mean by security and migration in the contemporary world? How do these two important fields intersect? And what does this collision of policy concerns and public interests mean for states and individuals alike? In this cutting-edge book, Elspeth Guild seeks to answer these pressing questions, drawing on a wide range of recent examples from the impact of asylum seekers on state border security to identity in citizenship rules to illustrate her arguments. By approaching the topic from the perspective of the individual – citizen of one state, migrant in another – the book examines key aspects of the security-migration nexus, such as the relationship with repatriation; torture; extraordinary rendition; privacy and the retention of personal data; and human rights protection. The first volume in Polity's new "Dimensions of Security" series, this book is a must-read for all students of international politics, development studies and related fields.

European Citizenship Under Stress-Nathan Cambioni 2020 "European Citizenship, although derived from the nationalities of the Member States, cannot play a significant independent role in reforming European constitutionalism in unanticipated ways by undermining some of the key assumptions underlying the notions of citizenship, equality and democratic accountability. Instead of implying merely as a super-structure atop Member State nationalities, it instead reshuffles the constitutional basics and not all Europeans emerge as winners as a result." Competing for Global Talent-Mamoni I. Abella 2006 Global talent has never been more mobile or sought after. A complex phenomenon that takes many forms, the movement of people with skills includes migrants crossing borders for temporary stays abroad as well as settlement, students moving for degrees and temporary and permanent stays, and even tourists and refugees who decide to stay abroad and use their skills. Countries attracting global talent increase their stock of human and technological skills, and in the past decade many have welcomed foreign professionals and students to redress domestic skill shortages and to quicken economic growth. This book includes general and theoretical papers on skilled migration and also papers on the country experiences of Australia, India, Japan, Singapore, the United Kingdom, and the United States. It addresses the socio-economic and cultural challenges created by increased mobility in a world where globalizing and localizing forces are at work simultaneously.

Black Identities-Mary C. Waters 2009-06-30 The story of West Indian immigrants to the United States is generally considered to be a great success. Mary Waters, however, tells a very different story. She finds that the values that brought West Indians to America, a lack of attachment to ties of family and community, a lack of politi- cal action, a desire for education, an incentive to save—are undermined by the realities of life and race relations in the United States. Contrary to long-held beliefs, Waters finds, those who resist Americanization are most likely to succeed economically, especially in the second generation.

Urban Anthropology and Studies of Cultural Systems and World Economic Development-1899 Migration Law in Ghana-Samuel Obeng Mantey 2018-06-27 Derived from the renowned multi-volume International Encyclopedia of Laws, this monograph on the rules on immigration and right of residence of non-nationals in Ghana examines the legal and administrative conditions for persons not having the citizenship of a State to enter the country and to stay and reside there. It provides a survey of the subject that is both usefully and comprehensively and thus enhances its usefulness as a reference book. We include a number of recent examples from the impact of asylum seekers on state border security to identity in citizenship rules to illustrate her arguments. By approaching the topic from the perspective of the individual – citizen of one state, migrant in another – the book examines key aspects of the security-migration nexus, such as the relationship with repatriation; torture; extraordinary rendition; privacy and the retention of personal data; and human rights protection. The first volume in Polity's new "Dimensions of Security" series, this book is a must-read for all students of international politics, development studies and related fields.

From Migrants to Citizens-T. Alexander Aleinikoff 2013-01-25 Citizenship policies are changing rapidly in the face of global migration trends and the inherently diverse and dynamic nature of societies. The debates are fierce. What should the requirements of citizenship be? How can multi-ethnic states forge a collective identity around a common set of values, beliefs and practices? What are appropriate criteria for admission and rights and duties of citizenship? This book includes chapters on international and local policy-making, comparative case studies, and an analysis of citizenship policies in various countries. It also provides a broad framework for understanding citizenship policies in a global context, addressing the key questions and concerns raised by contemporary debates on citizenship. The book is a valuable resource for students, researchers, and policymakers interested in understanding the complex and dynamic nature of citizenship policies in different countries.

The Rights of Non-citizens-United Nations. Office of the High Commissioner for Human Rights 2006 International human rights law is founded on the premise that all persons, by virtue of their essential humanity, should enjoy all human rights. Exceptional distinctions, for example between citizens and non-citizens, can be made only if they serve a legitimate State objective and are proportional to the achievement of the objective. Non- citizens can include: migrants, refugees and asylum seekers, victims of trafficking, foreign students, temporary visitors and stateless people. This publication looks at the diverse sources of international law and emerging international standards protecting the rights of non-citizens, including international conventions and reports by UN and treaty bodies.
