Rethinking the Decline of China's Qing Dynasty and the America-Pacific Order at the Turn of the Nineteenth Century: Asian States and Empires

This book rethinks the decline of China's Qing Dynasty and the America-Pacific Order at the turn of the nineteenth century. It challenges the traditional narrative of China's decline in the late Qing Dynasty and explores the diplomatic, economic, and military interactions between China, the United States, and other Asian states. The authors argue that China's Qing Dynasty was not weak and in need of reform, but rather a strong and viable political system with its own unique path. They also examine the role of the United States in shaping the America-Pacific Order and the implications for current international relations.
