Environmental Law and Policy - Daud Hassan 2018-08-21 International Marine Environment Law and Policy presents a critical appraisal of the main issues, actors and institutions engaged in the legal aspects of marine environmental conservation. With contributions from an international range of authors, this volume provides a concise account of the legal and policy framework underlying international marine environmental issues, and of the fundamental concepts and strategies that are important to the protection of the marine environment. This work provides a solid foundation for researchers, practitioners and students interested in gaining an understanding of this highly important subject.

Transboundary Freshwater Ecosystems in International Law - Ruby Moynihan 2021-08-31 A global water crisis with far-reaching interconnected environmental, social, health and economic impacts threatens the world. Healthy ecosystems and ecosystem services are degrading, and access to a sustainable water supply is increasingly inequitable both within and between States. This book demonstrates how to overcome the global freshwater ecosystem crisis by matching the scientific recommendations with an international legal framework fit for the task, which re-orientates international water law towards a stronger ecosystem approach that also protects vulnerable societies. It illustrates how to understand the fragmented legally binding and non-binding instruments of the United Nations Economic Commission for Europe environmental treaties as one coherent legal regime, which contributes to strengthening general rules and principles of the law concerning transboundary freshwater ecosystems. With the recent global opening of the UNECE regime, this book explores its potential role within the European region, Central Asia, Caucasus, Africa, the Middle East and beyond.
