The Impact of Scientific Evidence On The Criminal Trial The Case Of DNA Evidence

By David P. Farrington 2003-09-02 Crime prevention policy and practice is, on the whole, far from objective. Instead of being based on scientific evidence, the crime policy agenda is seemingly driven by the concerns of politicians, the political parties, the media, the judiciary, public opinion, and other non-scientific considerations. The book highlights evidence-based crime prevention policy and practice, and the importance of considering the scientific basis of crime prevention policy and practice. The book also provides practical guidance for policymakers, practitioners, and researchers in crime prevention.
