across a range of areas, including institutional relations, political economy, law and justice, foreign affairs, demographics, and the environment. While the current debates do not always perfectly align with the concerns of the future after Europe after Brexit, they share the same conviction that carefully scholarly analysis is in need - more now than ever - of those who are to understand what lies ahead for the EU. Praxis for Brexit and Beyond helps the informed, thought-provoking tour through the vantages of British exit with the question of Europe's fate now far from sight...Brexit is a wake-up call for the EU. For how it responds is an open question— but respond it must. To better understand its options going forward, it has never been clearer that in the eye of the storm, their lucid detail, and the collection of essays by leading scholars will prove a very valuable reference for those concerned with the defined rights and duties of courts and people in criminal cases. The United Kingdom of Great Britain is widely recognized as the cradle of modern democracy. The British spread their style of government across the globe during their imperial period. Countless former殖民 powers governments across the world owe their democracies to the British constitution. Even the Constitution of the United States of America, that was drafted during a rebellion against the British Empire, owes much of its substance to British political philosophy grounded in the Magna Carta, and enlightenment philosophers like John Locke.

The Rights of the British Colonies Asserted and Proved. by James Otis, Esq-James Otis 2018-04-18 The 18th century was a wealth of knowledge, exploration and rapidly growing technology and recording. In the era, the political struggles of the new nation and the world that emerged from the large scale political and economic changes and downturns that continued on into the 19th century. In addition to this new era, the political and social structures of the 18th century experienced major transformations.

The British Crown responded to crises in its colonies with a heavy hand. Lisa Ford shows how imperial peacekeeping methods, which blurred the line between the rule of law and the rule of the sword, transformed the imperial constitution and corroded colonial subjectivity.

The Idea of Greater Britain

Duncan Bell 2011-04-17

During the tumultuous closing decades of the nineteenth century, as the prospect of democracy loomed and as intensified global economic and strategic competition reshaped the political imagination, British thinkers grappled with the question of how best to organize the empire. Many found an answer to the anxieties of the age in the idea of Greater Britain, a union of the United Kingdom and its settler colonies in Australia, Canada, New Zealand, and southern Africa. In The Idea of Greater Britain, Duncan Bell analyzes this fertile yet neglected debate, examining how a wide range of thinkers conceived of this vast “Anglo-Saxon” political community. Their proposals ranged from the fantastically ambitious—creating a globe-spanning nation-state—to the practical and mundane—reinforcing existing ties between the colonies and Britain. But all of these ideas were motivated by the disquiet generated by democracy, by challenges to British global supremacy, and by new possibilities for global cooperation and communication that anticipated today’s globalist debates. Exploiting attitudes toward the state, race, space, nationality, and empire, as well as highlighting the vital theoretical functions played by visions of Greece, Rome, and the United States, Bell illuminates important aspects of late-Victorian political thought and intellectual life.

Great Britain, the Dominions and the Transformation of the British Empire, 1907-1931

Jarema Valkom 2021-02-16

The relations of Great Britain and its Dominions significantly influenced the development of the British Empire in the late 19th and the first third of the 20th century. The mutual attitude to the constitutional issues that Dominion and British leaders have continually discussed at Colonial and Imperial Conferences respectively was one of the main aspects forming the links between the mother country and the autonomous overseas territories. This volume therefore focuses on the key period when the importance of the Dominions not only increased within the Empire itself, but also in the sphere of the international relations, and the Dominions gained the opportunity to influence the forming of the imperial foreign policy. During the first third of the 20th century, the British Empire gradually transformed into the British Commonwealth of Nations, in which the importance of Dominions enrolled. The work is based on the study of uncollected sources from British archives, a large number of published documents and extensive relevant literature.

The King’s Peace

Lisa Ford 2021-08-10

During the Age of Revolution, the British Crown responded to crises in its colonies with a heavy hand. Lisa Ford shows how imperial peacekeeping methods, which blurred the line between the rule of law and the rule of the sword, transformed the imperial constitution and corroded colonial subjectivity.
