Persons with Asperger Syndrome and Employment

People with Asperger Syndrome can face challenges in developing interpersonal relationships that differ from those of other people. For example, difficulties with understanding other people's emotions, maintaining eye contact, difficulties with communication, and difficulties with initiating and maintaining social interactions. People with Asperger Syndrome may have unique strengths, such as an increased capacity for perspective-taking and a desire to understand the thoughts and feelings of others. These strengths can be beneficial in the workplace, where people with Asperger Syndrome may excel in roles that require strong social skills, such as customer service, sales, or administrative work. 

Asperger’s Disorder / Syndrome – social interaction deficit; – restricted, repetitive behaviours. – no language delay and average cognitive skills PDD-NOS / Atypical Autism – social impairment; language difficulties or repetitive behaviors.

Asperger Syndrome is a form of autism. With typical autistic children, language delays (trouble speaking or not speaking at all) are found in most cases, with Asperger's, these delays are much less common. People with Asperger's syndrome generally have average to above average intelligence. For example, children with Asperger's syndrome may have exceptional skills in specific areas, such as music, math, or art. The characteristics of people with Asperger's syndrome may vary from very mild to severe, and the severity of the symptoms can change over time.
