Thank you entirely much for downloading the book [Title] and learning more about the The Technosphere The Law Of Time In Human Affairs.

Rather than enjoying a fine book taking into account a cup of coffee in the afternoon, instead they juggled taking into account some harmful virus inside their computer.

Thank you entirely much for downloading [Book] Time And The Technosphere The Law Of Time In Human Affairs.

Imagery reveals the clear distinction between third-dimensional astronomical time and the fourth-dimensional synchronic order of the Law of Time, which holds enormous potential for the future of humanity.

Manifesto for the Noosphere

• Explains the Great Calendar Change of 2004 and its enormous potential for the future of humanity. In Time and the Technosphere, José Argüelles presents a groundbreaking study that distinguishes the natural time of the cosmos from the artificial mechanistic time. Argüelles defines the actual nature of time as the frequency of synchronization. Applying this Law of Time to an understanding of the entire system of life on Earth, he shows that in order to restore Earth's ability to sustain life, we must change our definition of time and adopt a natural harmonic calendar based on the 13-month 28-day cycle. Until the creation of the Gregorian calendar and the 60-minute hour, most of humanity lived by the 28-day cycle of natural time. The adoption of artificial time has subjected us to a 12:60 time frequency that governs the entire global industrialized civilization—the technosphere. With the collapse of the Twin Towers on September 11, a fissure was created in this artificial technosphere, opening up the noosphere (Earth's mental envelope). Humanity has a golden opportunity to leave the strife of the past and enter a new time by adopting a natural harmonic calendar that will repair the damages caused by the irregular temporal of technosphere time.

• Reveals September 11 as the signal of the end of artificial time according to the Law of Time. • Long awaited sequel to the author's bestselling book The Mayan Factor.

The Mayan Factor: A Beginner’s Guide to the Dreamspell and 13 Moon Calendar

José Argüelles brings in the Mayan long-count calendar, radical theories on the nature of time, advanced states of consciousness, and the an unprecedented “mind shift” that mirrors the emergence of life itself on the planet. Manifesto for the Noosphere is intended to inform and prepare humanity for the unprecedented “mind shift” that mirrors the emergence of life itself on the planet.

The anthropocene Working Group investigating it. The book discusses ongoing changes to the Earth system within the context of deep geological time, allowing a deal comprehensively with the mandala, the principle of the center, as a universal image, a vision, a way of growth, a ritual technique, and an essential life process.

The Earth Ascending

According to holonomy—the law governing whole systems—and its ancient precursor, Chinese geomancy, human consciousness and intuition play a formative role in the structure and evolution of the universe. Through Argüelles's eyes we see how nature presents itself, how man learns from and transforms nature, how nature evaluates man's transformation, and finally, how man and nature synthesize—Back cover.

The Mayan Factor—José Argüelles 1987-04-01

The Aztec and the Inca: A Geocultural Timeline

Earth Ascending—José Argüelles 1984 “Reveals the 'sacred order of the cosmos' through fifty detailed maps within a five-part structure called the holonomic equation. According to the holonomic—law governing whole systems—and its ancient precursor, Chinese geomancy, human consciousness and intuition play a formative role in the structure and evolution of the universe. Through Argüelles's eyes we see how nature presents itself, how man learns from and transforms nature, how nature evaluates man's transformation, and finally, how man and nature synthesize—Back cover.

The Anthropocene: A Geocultural Timeline

José Argüelles 1996

Arcturus is the name given to the star system some thirty-seven light-years from our own. It includes at least a half dozen planets and is one of the closest star systems to our own. It is the closest star system to our own in the solar neighborhood of the Sun, and is a likely target for future space missions.

The Arcturus Probe—José Argüelles 1996

August 2002, a new discovery was made when an object was observed to pass through the solar system. This object was later identified as the first interstellar object to be observed by humans. The object was given the designation 'Oumuamua.'

The Zoraya of José Argüelles 1988-08-01

José Argüelles presents a groundbreaking study that distinguishes the natural time of the cosmos from the artificial mechanistic time. Argüelles defines the actual nature of time as the frequency of synchronization. Applying this Law of Time to an understanding of the entire system of life on Earth, he shows that in order to restore Earth's ability to sustain life, we must change our definition of time and adopt a natural harmonic calendar based on the 13-month 28-day cycle. role of the Four Directions and the planet Venus in one’s personality matrix and life issues. Included are extensive, easy-to-use tables of Mayan astrological data, allowing readers to determine their day-signs, to see how these signs are also influenced by the cycle of the Night Lords and the 13-day trecena, and to cast their own horoscopes.

2012 Joseph Geller 2014-09-11 December 2012 was believed to mark the end of the thirteenth B’ak’tun cycle in the Long Count of the Mayan calendar. Many people believed this date to mark the end of the world or, at the very least, a shift to a new form of global consciousness. Examining how much of the phenomenon is based on the historical record and how much is contemporary fiction, the book explores the landscape of the modern apocalyptic imagination, the economics of the spiritual marketplace, the commodification of countercultural values, and the cult of celebrity.

2012 and the Galactic Center Christine R. Page 2008-08-13 A guide to the expansion of consciousness possible during the Galactic Alignment of 2012 • Reveals the new era that will be ushered in as the current perception of time collapses and spiritual perception expands • Explains the psycho-spiritual preparations necessary to transition into this new era • Shows how the alignment of the sun with the Galactic Center will allow humans to experience awareness normally reserved for shamans, pharaohs, and sages

This is an extraordinary time in the planet’s history. In 2012, for the first time in almost 26,000 years, our sun will be most closely aligned to the Galactic Center. This Galactic Alignment, which began with the Harmonic Convergence in 1987 and will conclude in 2023, presents a thirty-six-year window of opportunity for humanity to participate in the creation of a new era of expanded consciousness. Christine Page explains that, as the source of all creation, our galaxy is the Great Mother and its center, her heart. Auspiciously aligning Earth with the heart of the Great Mother, the Galactic Alignment heralds a rebirth of the divine feminine qualities of the Triple Goddess—intuition, emotional creativity, and renewal. Drawing on alchemy and mythology, Page details how to connect with and use the sacred spiritual tools unlocked during the alignment to merge with the Great Mother, a spiritual transformation that allows us to expand our awareness and experience ourselves as eternal beings.

The Mystery of 2012 Various Authors 2009-01-01 Are we coming to the end of a cosmic cycle? Will there be an age of awakening, or even an end to the world we know? For the first time, the leading authorities on the 2012 phenomenon are all given voice in a single book: The Mystery of 2012. From the prophecies of the Mayan astronomers to modern predictions about social, ecological, and spiritual changes to our world, this comprehensive anthology offers you a chance to examine the mystery from every angle—and to decide for yourself whether 2012 will end with a whimper or a bang. Whether you’re a skeptic, a true believer, or simply “2012 curious,” here is a thought-provoking exploration of this approaching landmark in human history. The book includes essays by the following list of scholars, scientists, philosophers, and cutting-edge thinkers: Arjuna Ardagh José Argüelles, PhD Gregg Braden Carl Johan Calleman, PhD Gill Edwards Jean Houston, PhD Barbara Marx Hubbard Janosh John Major Jenkins Lawrence E. Joseph John Lamb Lamb Ervin Laszlo Llewellyn Vaughan-Lee, PhD Meg Blackburn Losey, PhD Joanna R. Macy, PhD Karl Maret, MD Corinne McLaughlin James O’Dea Christine Page, MD John L. Petersen Daniel Pinchbeck Sharron Rose Peter Russell Robert K. Sillit Geoff Stray Jay Weidner
