The primary benefit of a REIT status is the exemption of shareholder dividends from the double taxation that applies to dividends of traditional corporations (Graff 2001). In addition, REITs generate further savings from...

**The Lump of Labor Theory**

The labor-market theories focus on income and earning disparities to explain the major causes of poverty (Hurst, 2004). Marx (1932) pointed out that every good (including labor) has an exchange value and that the value of a good is the proportion of human labor invested in its production.

**Organizational Structure in The Hospitality Industry: A Comparative Analysis**

The role of agriculture in economic development for the structural transformation of an economy are: (1) an income elasticity of demand for food that is less than 1 and declining, and (2) the possibility of a substantial expansion of agricultural production with a constant or declining farm labor force. A third factor that has received less attention is probably of con...
